FORTIS BC™

Suite Metering Incentive Program

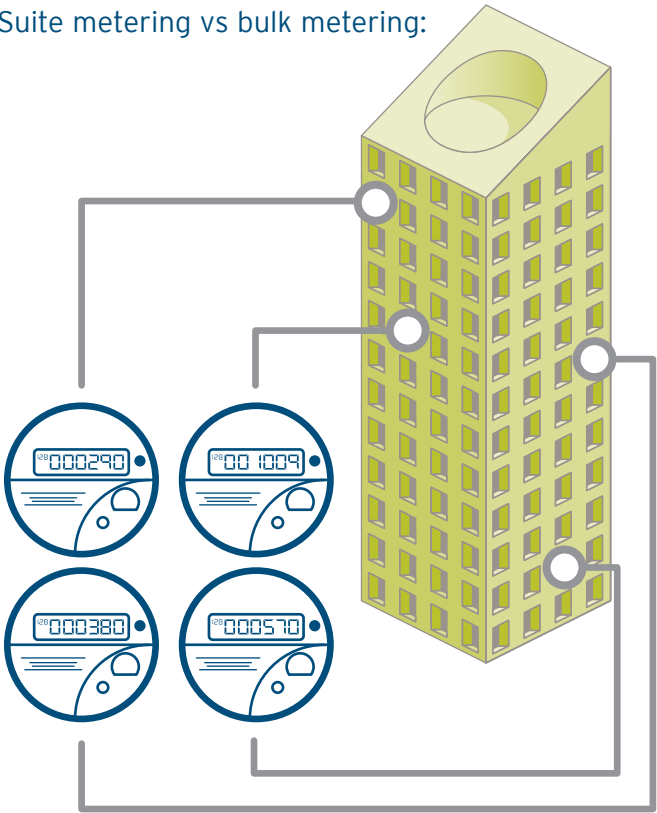

A cost saving energy solution for you—and your customers

Today's homebuyers love the comfort, convenience and value of natural gas appliances, but they don't want to subsidize the natural gas use of their neighbours. With suite metering, they won't have to.

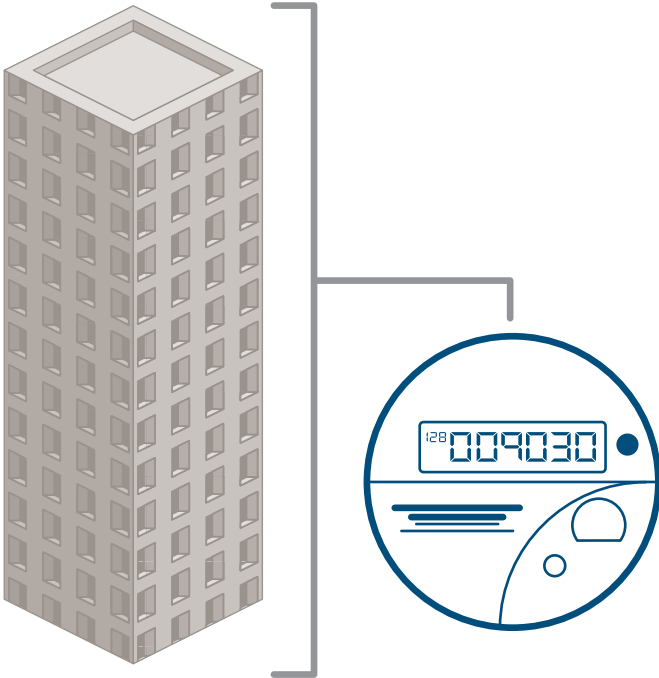

Suite metering gives homeowners control over their own utility costs. They'll enjoy additional savings through reduced strata fees, and the significant cost advantage of natural gas over electricity.

Suite metering vs bulk metering:

We can reduce your piping and meter installation costs.

- **We supply and install everything up to, and including, the gas meters.** FortisBC invests capital in natural gas appliances and piping.
- **Piping runs to suites are minimized.** We work closely with your design team to find strategic meter locations.
- **The total gas load determines our financial contribution.** The more natural gas appliances you include, the greater your financial benefit.
- **A suite metering solution can cost the same as a bulk metering installation.** This depends on the number of gas features in your development.

Ready to stand out?

Homebuyers associate natural gas appliances with luxury and quality.

Now, with suite metering, you can give them another good reason to purchase a new home in your project instead of a common metered development.

And, with our **financial incentives**, building with natural gas is even easier.
